

## About PSI

Since 1989, Patient Services, Inc. (PSI), is a national non profit charitable organization that provides a “safety net” for individuals and families across the country who are affected by chronic illness. Innovative patient assistance programs offer health care solutions that allow our patients to attain positive health outcomes.

The organization’s original purpose was to advocate and provide for the unmet needs of individuals affected by hemophilia and HIV. From this beginning, PSI’s mission expanded to assist families facing over a dozen different chronic illnesses. For nearly two decades, PSI has been able to assist thousands of patients in response to an ever-increasing need for premium and copay assistance.

PSI is the recipient of a positive advisory opinion by the U.S. Department of Health and Human Services Office of Inspector General (02-01), specifically allowing PSI to assist Medicare patients with premium and co-payment assistance without infringing upon enticement/inducement or anti-kickback statutes within its proposed agreement.

## *The Virginia ADAP Program*

## About ADAP

The Virginia AIDS Drug Assistance Program (ADAP) provides medication for the treatment of HIV/AIDS to eligible individuals without insurance coverage or third-party benefits for ADAP medications.

The individual must also meet financial eligibility requirements as established by the Department of Health.

## PSI ADAP Program Eligibility

Patient Services, Inc. (PSI), a Virginia-based non-profit patient assistance organization, will work with you to determine ADAP eligibility.

To qualify for ADAP services ...

- your yearly family income cannot be more than 400% of the Federal Poverty Level (FPL).
- if you are unemployed, you may be asked to provide a signed letter to document your non-employed status and explain how you are financially supported.
- your prescribed medications cannot be covered under a third-party insurance plan.
- you must not be eligible for Medicaid.

## How to apply

You can contact a PSI representative who will work with you during the application/recertification process to complete an application over the phone and inform you of any other documentation needed to complete your ADAP eligibility. If you wish to request an application, please contact PSI at 866-392-1309.
